▶ PREMIUM COLOR      ▶ DESIGNER COLLECTION COLOR  
Designer Collection is a palette of beautiful darker colors with tremendous homeowner appeal which resists fading and discoloring.

This is a visual representation of the actual fade that can be expected on standard vinyl siding vs. **Great Barrier** Premium Vinyl Siding. Colors shown are as close as the lithographic process will allow.

A BARRIER BETWEEN YOUR  
HOME AND THE ELEMENTS

**Great Barrier®**  
PREMIUM VINYL SIDING

- ▶ **AGELESS BEAUTY**—**Great Barrier** Premium Vinyl Siding replicates the look of natural cedar, yet its superior polymer surface can withstand many of the elements that erode wood finishes over time.
- ▶ **TOUGHER-THAN-NAILS CONSTRUCTION**—**Great Barrier** Premium Vinyl Siding has been engineered for lasting performance and superior resistance to high winds. The unique reverse rolled-over nail hem doubles the siding thickness at the nailing surface, where the product needs it most.
- ▶ **LOW MAINTENANCE**—The low gloss natural cedar woodgrain pattern requires just an occasional rinsing with a garden hose to keep it looking like new. You'll save by never having to scrape, sand or paint ever again.

**JAWSLOCK®**  
ONCE IT'S LOCKED, IT NEVER LETS GO!

IN WINDLOAD TESTS, THE DOUBLE THICK **GREAT BARRIER** HEM WAS STRONG ENOUGH TO BEND THE NAIL HEADS.

THE CURLED TEETH HOLD THE PANELS FIRMLY TOGETHER. LIKE A GREAT WHITE SHARK, ONCE THESE "JAWS" CLOSE, THEY DON'T LET GO.

**GET A SAFE, SECURE INSTALLATION  
WITH GREAT BARRIER**

Your professional installation crew takes every possible precaution to make sure your new siding looks and performs its best.

They use the Norandex proprietary **NailRIGHT** Siding Installation System to help them locate and precisely nail into the framing studs. This is a very important detail because misapplied nails can cause siding to buckle, blow off in windy conditions, or be hazardous if they strike wiring or plumbing located between the studs.

**NailRIGHT** helps assure an accurate and safe installation. It securely connects the siding to the wall for optimum performance.

This means the beautiful siding you select will not only stand out, but will stay up, even in extreme weather conditions.

Beauty and Performance. It's the perfect siding combination to make the exterior of any home...perfect.

**AVOID:**

Nails that miss their mark can be potentially hazardous to items, like wiring and plumbing, located in the cavities between studs.

**NailRIGHT** helps guide the installer to the studs for an installation that's strong, secure and resistant to blow offs.

**NailRIGHT** assures the proper amount of nails are used, saving your home from unnecessary hammer hits.
